

DO NOT PRINT THIS PAGE:

Each of the following pages has rules for one table, 7 pages are for seven different rules on 7 different tables.

Look at the word KWIKSLAG to see the difference in each (The capital letter is different places).

## Kwikslag

Cards only 28 cards are used 8, 9, 10, Jack, Queen, King and Ace in every colour

Ace is the Highest card

## Players

3-6

## To deal the cards

The dealer shuffles the cards and starts to deal them one by one

Every player has the same number of cards (4-9 cards - depends on number of players)

## Start

The Player to the right of the dealer starts by playing a card

The other players throw a card as well on their turn. The cards which are played (one by each player), make one round.

## To win a round

When every player has thrown a card the highest card wins the round. The player that threw the highest card, collects the cards and puts them together by their side.

## To continue

The winner of the last round, opens the next round in the same way that is described before. The set goes on until all cards are played.

## Next card

The first player of every round chooses the suit (Clubs, spades, diamonds, hearts) he throws. The other players have to throw a card of the same suit. (So if the first card is a heart, everyone must play a heart). If you do not have a card of the same suit, you play a card of a different suit. The player who threw the highest card of the initial suit wins.

## Thumbs

Hearts are thumbs. If you cannot throw a card of the suit with which the round is opened, you can play thumbs. This is called "byeing". You win this round even when your thumb is a lower card. But other players could also play a thumb. In this case the highest card of Hearts wins.

## End of the set

The set is over when one player has no more cards left. The remaining cards with the other players are discarded. The player who won the most rounds, wins the set.

## Explanation of vocabulary.

Suit: Hearts, Diamonds, Clubs and spades.

Round: When everyone has thrown a card on the table, someone wins that "round".

Thumbs: The suit which is always worth more than the other suits.

Tournament: all the games together

Games: on every table the game is played. Above you find the rules of the game.

Set: When the cards are shuffled and dealt, you start a new set.

Turn: When you have to throw a card, it is your turn.

## kWikslag

Cards only 28 cards are used 8, 9, 10, Jack, Queen, King and Ace in every colour

Ace is the lowest card

## Players

3-6

## To deal the cards

The dealer shuffles the cards and starts to deal them one by one
